CORE COMPETENCIES

Assessment, Evaluations & Tracking

- Assessment projects, involving approaches such as surveys, focus groups, and analysis of work or learning analytics data
- Research on key topics in professional industries and innovative assessment approaches
- Retreat facilitation to enable team to plan or revise current approach

Performance & Change Management

- Identification, assessment, mapping and planning associated with engaging people interested or affected by project and programs.
- Activities for assessing change readiness and impact; creating a shared vision, establishing a compelling business case, and defining an effective change management strategy and execution plan.
- Activities that drive and embed change within the organization through leadership and organizational preparedness, motivation, incentives and cultural adjustments.

Video Training & Instructor Led Training (ILT)

- Transform traditional learning using a state of the art multi-media and video environment
- Integrates simply with Learning Management Systems
- Enables 24/7 collaboration on all types of media, with moment-in-time tagging for contextual reference

Branding, Marketing - Talent Development

- Develop brand & strategy to transition to new career or connect with desired audience
- Create impactful video and graphic brand stories
